DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, 26 drawn to a filter unit, classified in class 55, subclass dig. 30.
- II. Claims 9-25, 27-30, drawn to a filter system, classified in 422, subclass 177. The inventions are distinct, each from the other because of the following reasons:
- 2. Inventions I, II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as catalytically removing nitrogen oxide from exhaust gas, invention I has separate utility such as removing soot particles from exhaust gas. See MPEP § 806.05(d).
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
